

Chromatography Software from Chromatography Specialists

DataApex is an independent software company with expertise in developing and manufacturing chromatography data stations. DataApex's solution combines hardware and software developed in DataApex laboratories with a commitment to providing quality technical support.

Focused on customers: "Our development relies on the close relationships we have with our customers and business partners. DataApex is actively listening and at the same time developing and introducing new concepts and ideas into laboratory practice. This dialog helps us direct the future of our products." said Jan Hrubý, general manager of DataApex. "Our company, with its Clarity software, is now a recognized brand in the chromatographic industry."

Experience and stability: DataApex has been in the market of chromatography software since 1991. During the years we have gradually established our reputation by providing reliable software and hardware. The company is dedicated solely to chromatography software and its accessories.

DataApex is a stable company with continuous annual growth since its establishment. DataApex employs team of talented people with backgrounds in separation sciences, informatics, and electronics.

**ISO 9001
CERTIFIED**

Quality management: DataApex holds ISO9001:2008 certification, an authoritative international standard for quality control.

The certificate covers development, production, order processing and support procedures and it confirms that DataApex is strongly committed to providing high quality products and services to its customers.

Major Products:

DataApex chromatography data stations are used for data acquisition, evaluation, and instrument control. Our flagship product is Clarity Chromatography Software, now in a third generation of DataApex CDS products.

Key product: *Clarity represents a universal solution for laboratories. It acquires and evaluates data from up to four multidetector chromatographs at a time and is compatible with any commercially available chromatograph. Clarity includes support tools for GLP/ 21 CFR Part 11 compliance.*

*A wide range of software modules extends the standard set of features. These include **Extensions** for GPC, PDA, EA, CE, SST, NGA, DHA, MS and **Controls** for direct control of instruments.*

Clarity is highly regarded for its ease of use, excellent performance, cost-effectiveness and extensive customer support.

Distribution channel / OEM

DataApex's products are available through a non-exclusive distributor network. DataApex Partners are professional companies with extensive experience in chromatography.

Worldwide community: *DataApex products are sold to more than 100 countries around the world. 15 chromatography instrument manufacturers resell privately labeled (OEM) versions of DataApex software (as of 2016). The international head office for DataApex is based in Prague, Czech Republic (EU). DataApex chromatography software is the preferred choice of thousands of users around the world.*

Partner's Network: *DataApex's vision is to preferentially sell its products through competent and involved distribution channels. Partner's network includes Resellers, Authorized Distributors and Premium Partners. Details are available from DataApex's webpages.*

OEM products: *DataApex products are available as OEM versions for companies that sell chromatography software in quantity. Companies that are interested in distributing our software under their own brand name can obtain an OEM version according to their specific requirements. DataApex's experience in providing OEM solutions ensures that OEM versions will be delivered promptly.*
