

## Clarity2Go

Analysis monitoring for smartphones

Clarity2Go is a mobile companion to Clarity Chromatography Station.

It enables to monitor selected parameters of running sequences or single analyses conveniently from your mobile. Its use is **free** for all customers with Clarity station.

*The monitoring works only if both (smartphone and PC with Clarity) have access to the internet.*

The whole solution consists of three parts:

- Clarity Software (Full, minimal version 4.0.4) communicating with the web server.
- Clarity2Go web server run by DataApex is provided to Clarity2Go users free of charge.
- Clarity2Go application for smartphones and tablets.

Clarity2Go application is currently available only for Android ([Google Play](https://play.google.com/store/apps/details?id=com.dataapex.clarity2go)), new version for iOS is coming soon.

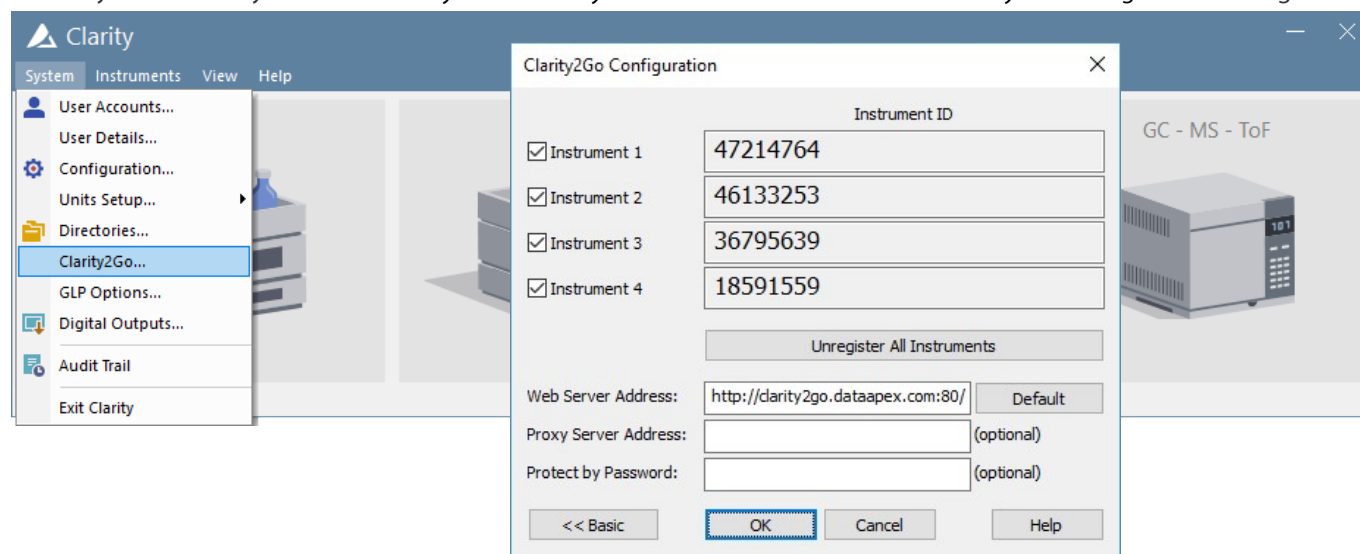

For more information go to <http://www.dataapex.com/clarity2go>

## How to use Clarity2Go

Enabling Clarity2Go in Clarity

In Clarity software on your PC use the *System - Clarity2Go...* command to invoke the *Clarity2Go Configuration* dialog.

Select the instruments for monitoring, in the above example we have selected all 4 instruments.

After checking the checkbox the Instrument is automatically registered on our server and you will receive unique *Instrument ID* for it. Use these *Instrument IDs* in Clarity2Go application on your smartphone/tablet.
